

Literaturverzeichnis zum Fachartikel “Die größten Irrtümer in der Neuroreha oder wie Neurorehabilitation effektiv wird“ von Sabine und Hans Lamprecht in „praxis ergotherapie“, Ausgabe 03-2024:

Ada, L.; Dorsch, S.; Canning, C. G. (2006): Strengthening interventions increase strength and improve activity after stroke: a systematic review. In: *The Australian journal of physiotherapy* 52 (4), S. 241–248 .

Ada, L.; Vattanasilp, W.; O'Dwyer, N. J.; Crosbie, J. (1998): Does spasticity contribute to walking dysfunction after stroke? In: *Journal of neurology, neurosurgery, and psychiatry* 64 (5).

Ardestani, M M.; Kinnaird, C R.; Henderson, Ch E.; Hornby, T. G (2019): Compensation or Recovery? Altered Kinetics and Neuromuscular Synergies Following High-Intensity Stepping Training Poststroke. In: *Neurorehabilitation and neural repair* 33 (1).

Blum, Carlos González; Scherfer, Erwin (2023): Neuro-Reha. In: *physiopraxis* 21 (02).

Canning, C G.; Ada, L; Adams, R; O'Dwyer, N J. (2004): Loss of strength contributes more to physical disability after stroke than loss of dexterity. In: *Clinical rehabilitation* 18.

Carr J H; Shepherd R B: *Stroke Rehabilitation* (2003): Elsevier.

Chiviackowsky, Suzete; Wulf, Gabriele; Wally, Raquel; Borges, Thiago (2009): Knowledge of results after good trials enhances learning in older adults. In: *Research quarterly for exercise and sport* 80 (3), S. 663–668.

Crossman, E. R. F. W. (1959): A theory of the acquisition of speed-skill. In: *Ergonomics* 2 (2), S. 153–166.

Dickstein, R.; Heffes, Y.; Laufer, Y.; Ben-Haim, Z. (1999): Activation of selected trunk muscles during symmetric functional activities in poststroke hemiparetic and hemiplegic patients. In: *Journal of neurology, neurosurgery, and psychiatry* 66 (2), S. 218–221.

Dobkin, B H. (2005): Clinical practice. Rehabilitation after stroke. In: *The New England journal of medicine* 352 (16).

Hillier, S; Worley, A. (2023): The effectiveness of the feldenkrais method. A systematic review of the evidence. *Feldenkrais Research Journal*. 7, (Apr. 2023).

Högg, Susan (2023): Armkrafttraining in der Schlaganfallrehabilitation. In: *neuroreha* 15 (02), S. 66–72.

Huber, Martin (2022): Das „Wie“ ist entscheidend – Die Renaissance der Bewegungsqualität. In: *physiopraxis* 20 (09).

Kim, Nan-Hyang; Cha, Yong-Jun (2015): Effect of gait training with constrained-induced movement therapy (CIMT) on the balance of stroke patients. In: *Journal of physical therapy science* 27 (3), S. 611–613.

Kirker, S. G.; Simpson, D. S.; Jenner, J. R.; Wing, A. M. (2000): Stepping before standing: hip muscle function in stepping and standing balance after stroke. In: *Journal of neurology, neurosurgery, and psychiatry* 68 (4), S. 458–464.
